# ORGANIC NUTRITION PLUS

October 1, 2009

Andreanna,

Kim and I thoroughly enjoyed training with you in New York. Your knowledge of complex concepts far exceeds your academic credentials. Your grasp of the intricacies of the body is amazing and motivating.

We were able to implement what we learned on Monday morning and it has made a major difference in our skill level for accuracy in our nutrition practice.

The foundational concepts we learned with you prepared us to be ahead of the curve as we studied in advanced training in ART II & III.

Please keep us posted as to any future training classes you will be teaching. Would you consider a weekend at our place next year?

With tremendous gratitude and respect,

Milton
